

Policy Title: Course Sequencing - BACC 1 and BACC 2 Programs

The curriculum of The University of Texas Health Science Center at Houston, School of Nursing is designed to sequence learning about nursing care of human beings, from individuals, families, groups and communities, in order that each level of the program builds on previous learning. The program is carefully integrated to facilitate learning. The clinical course provides the arena for synthesis, in which the student must combine knowledge from the didactic course to produce a plan of care to facilitate the health of patients/clients.

The junior year focuses on nursing care of individuals. The senior year focuses on families, groups, and communities. Since each level builds upon the knowledge and experience gained through the previous courses, prerequisites and corequisites for each course must be followed.
