

## Policy Title: Management of Metric Conversions, Intake and Output Dosages and Solutions

---

### Policy

Prior to medication administration, students taking clinical courses will be required to successfully pass with 100% accuracy a test of ten questions on Dosages and Solutions. Three opportunities for achieving the required score will be given in each course. Students not passing on the third opportunity with 100% accuracy will be administratively withdrawn from the course with a "WF". There will be no make-up exams. Students missing an exam will be given a zero for that exam.

### Procedure

1. The incoming students will be advised regarding the U3360 policy and required textbook.
2. An online review is available and can be completed prior to the first Dosages & Solutions tests.
3. Students not achieving 100% accuracy on Test 1 and Test 2 will be referred to tutorial sources.
